C A T A L O G

Once you've decided on a shape, it's time for the right design. We offer several options: wood veneer, laser graphics, inlay (an inlay of two or more types of wood), or conventional printing on plastic - the decision is yours!

In this catalog you will find sample images, information about the design process and prices.

Please also note the estimated production time: Some design requests can only be implemented with a four-week lead time.

# THE PROCESS

From the first idea, to the ideal shape finding, to the design and then the final workshop. Here we describe how you build your own skis with us.

## Registration & Questionnaire

After you have registered, we will send you all the information about the workshop and the design process. We will also send you a link to a questionnaire where we will ask you a few facts for your ski or board construction.

## Design finding

Now it's your turn:

We will send you a design sketch sheet on which you can sketch and describe your design wishes.

Please send your design idea to [\*\*design@spurart.at\*\*](mailto:design@spurart.at)

Our design team will now work with you to see how we can best implement your ideas and help you with the graphic realization.

Here are our guidelines:

Depending on the design method you choose, we need your design idea in time: about 2-4 weeks before your workshop date (see graphic for exact times) - of course we are happy to receive it earlier.

## Shape finding

In a consultation on the phone we talk through everything important and find the right shape for your ski or board wishes. We will call you about 2 weeks in advance of your workshop.

In the meantime, we prepare your design and then set the other preparations for a smooth process at the workshop in progress: We plan the cores, prepare the bases and get the necessary materials ready.

## Workshop

On your workshop weekend you will build your individual ski or personalized board with us in just two days.

We will explain all the important steps to you, of course we will help you with words and deeds and provide insights into the specialties and intricacies of ski and snowboard construction.

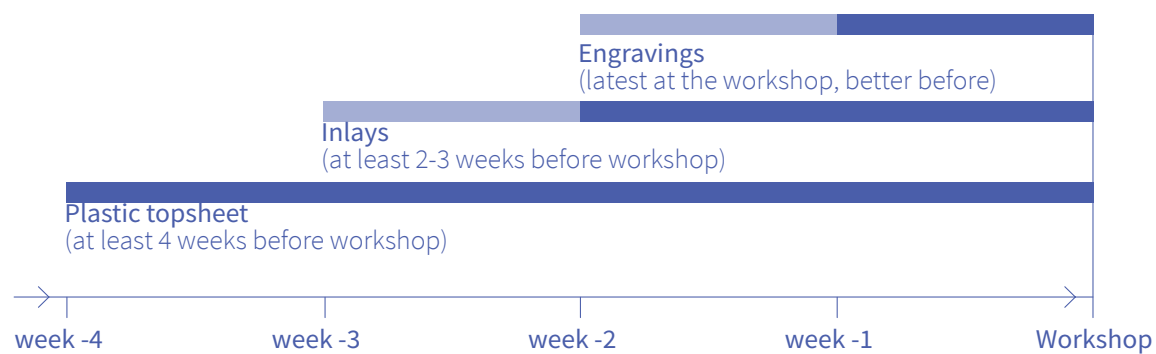

We work in **small groups with a maximum of 8 participants**.  
No previous craft knowledge is required. We will show you how it's done.

It is best to bring clothes for the workshop that can get dirty, as we will be working with epoxy resin. We recommend wearing a mask and long-sleeved clothing for the sanding work. Other protective equipment such as gloves, goggles and noise protection will of course be provided.

## Tuning

After the workshop we will take care of your **engravings**. In addition, your skis and snowboards get a final **grinding and tuning** so that they are ready for use.

After the **binding assembly** your  
unique piece is then ready and  
can be picked up or shipped.

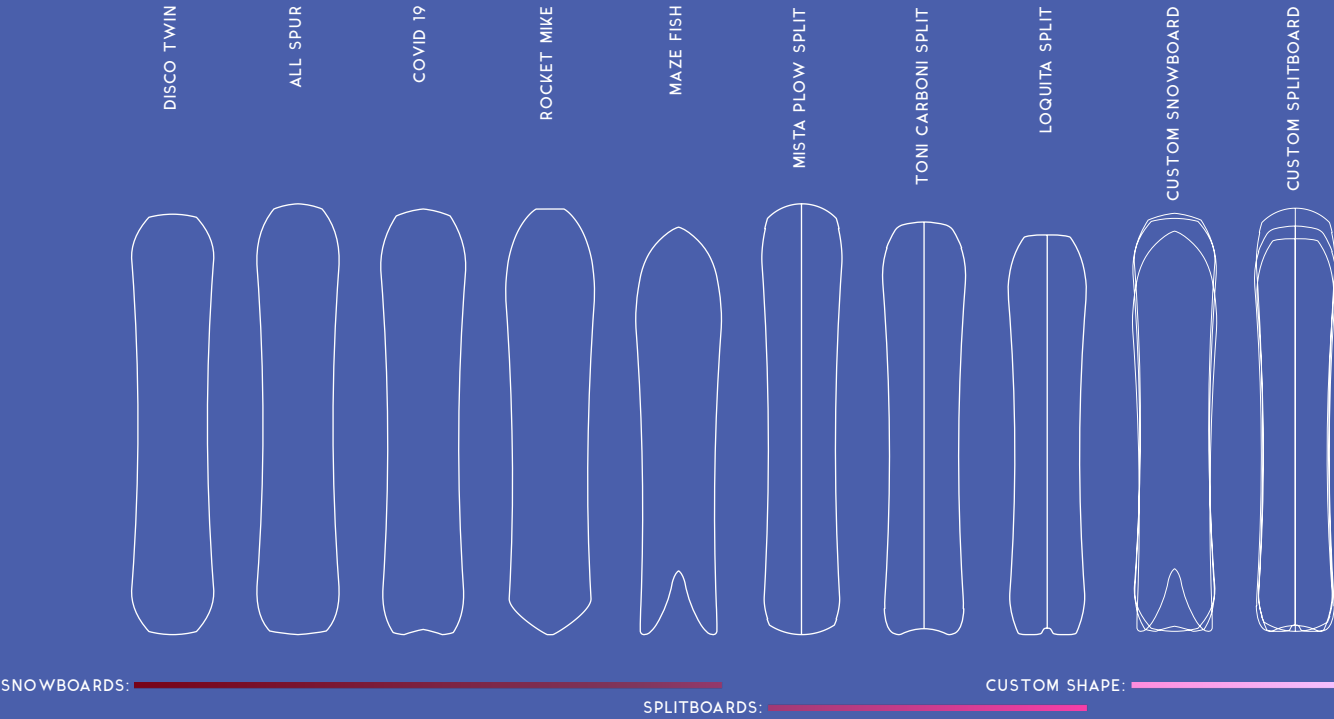

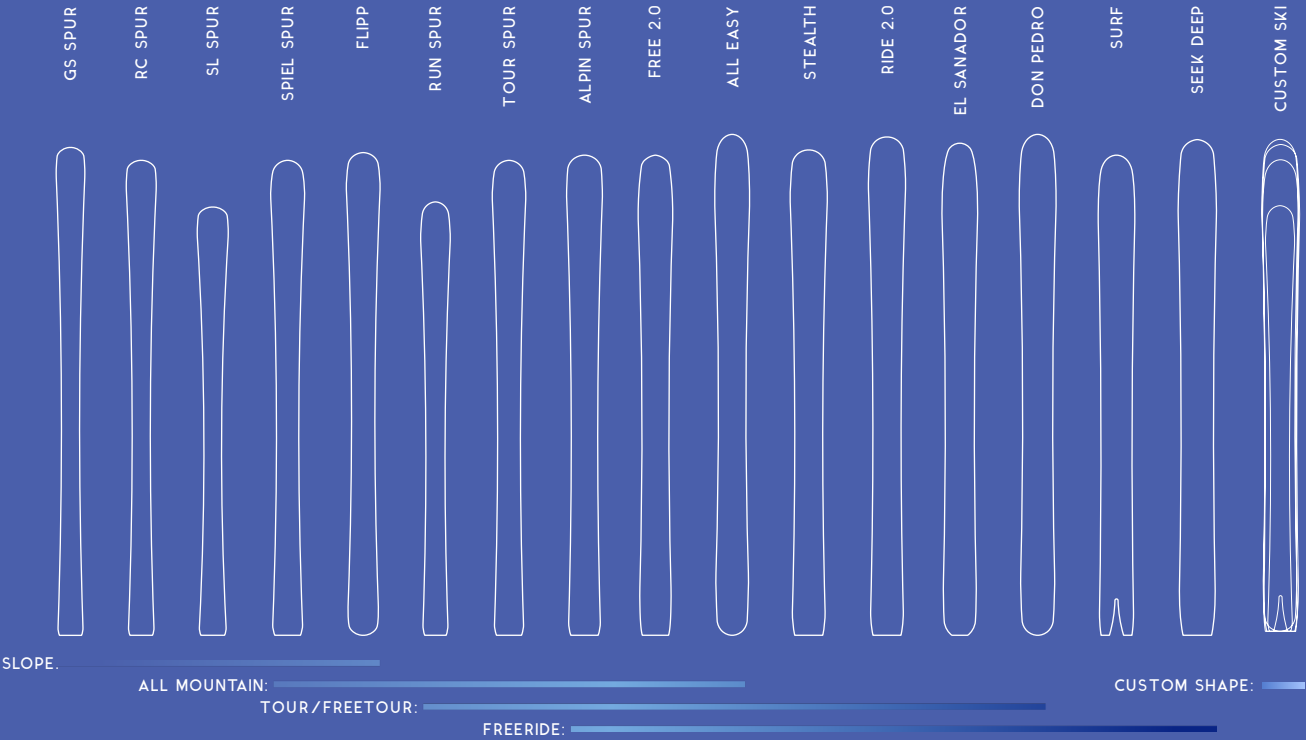

# THE SHAPE

We have a wide range of ski and board models where you are going to find the right shape for your needs. On our [website](#) you can use the Shape Finder to narrow down your search and find a detailed description for each shape.

And if you can't find what you're looking for: With the option of a CUSTOM Shape we can customize your skis or board to your individual needs.

If you are not sure or would like advice: In a telephone consultation, we will see together which shape is the right one for you.

CLICK HERE TO GO TO THE SHAPE-FINDER →

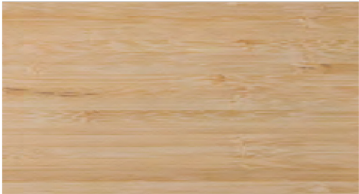

# WOOD VENEERS

Wood veneers are very suitable as a plain topsheet and can be engraved with the laser. We also combine different wood veneers for inlays (marquetry). We have our ten standard veneers in stock, but the grain and intensity of the colors can vary.

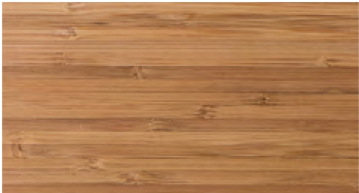

The agony of choice in the choice of wood - but we can promise you one thing: They are all beautiful!

## BAMBOO LIGHT

Simple and classically elegant. Particularly robust and resistant to water and ice.

- already included in the price

## BAMBOO CARAMEL

Simple and classically elegant. Particularly robust and resistant to water and ice.

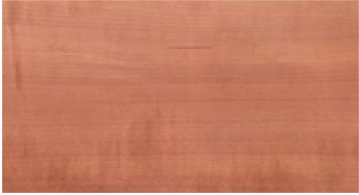

- already included in the price

## OLIVE

Strong grain, quite noble and robust.

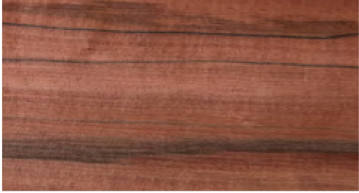

- 100 €

## PEAR

Native precious wood with a slight red tint and even grain.

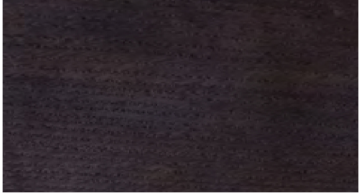

- 40 €

## INDIAN APPLE

Red as love, with gray mottled grain.

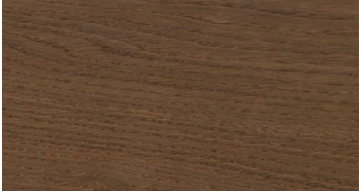

- 40 €

## COCO OAK COFFEE

Dyed domestic oak, almost black and elegant.

- 60 €

## COCO OAK COGNAC

Dyed domestic oak, warm brown and consistent grain.

- 60 €

## NUT

Gray-brown tones with varying dark heartwood grain.

- 60 €

## CHERRY

Long grain with a red-yellow play of colors.

- 60 €

## MAPLE

Our lightest veneer, with fine grain and velvety sheen.

- 40 €

# INLAYS & ENGRAVINGS

There are basically two options available for your design: Inlays and laser engravings.

**Inlays** are marquetry made of different wood veneers and are cut by laser and put together like a puzzle.

**Engravings** are laser burned onto the wood surfaces and create a lightly engraved surface. Depending on the type of wood, the engraving will then appear medium to dark brown. The darker the wood, the less the engraving will stand out in the end.

Here you can see a few examples of how you can imagine inlays and engravings. We are also happy to combine both.

Inlay  
Coco Oak Coffee + Olive

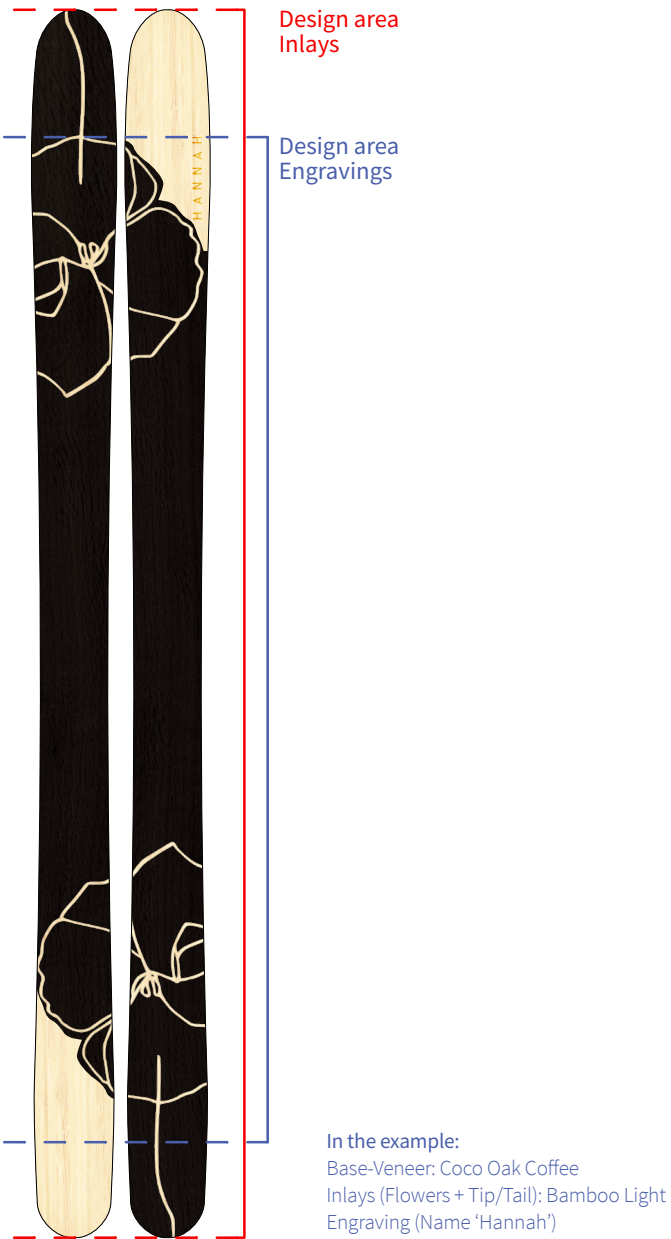

Inlay  
Nut, Maple, Pear, Coco Oak Coffee, Cherry

Inlay + Engraving  
Indian Apple, Maple (engraved)

Engraving  
Bamboo Caramel (engraved)

## Please note:

**Inlays** are prepared by us prior to the workshop, so please allow a lead time of **3 weeks** so that we can implement your ideas in the best possible way. Inlays can go along the entire length of the ski.

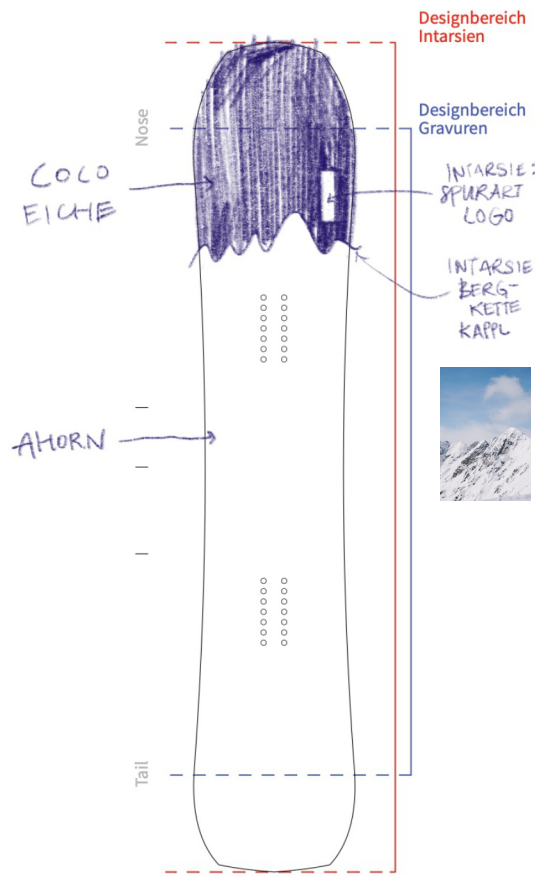

In contrast, **engravings**: as we can only engrave the ski once it is built. Unfortunately, for technical reasons, we cannot engrave the ski tips or tails. Please keep this in mind with your design idea. Engravings will be burned on the ski after the workshop. The documents for this should be brought to the workshop weekend at the latest - **it is best to send them to us 2 weeks in advance.**

# DESIGN PROCESS

As soon as you have sent us the design sketch sheet ([design@spurart.at](mailto:design@spurart.at)), we start working on your individual design wishes. Usually we will send you a first proposal and ask you for feedback, so that we can implement the corresponding changes in a second proposal.

In the example on the right you can see what can be created from the design idea 'I would like to have my favorite mountain on the design'. Whether flat or detailed inlay, pure engraving or a combination of both: There are no limits to creativity and we are happy to support you.

Your sketch on the design sketch sheet

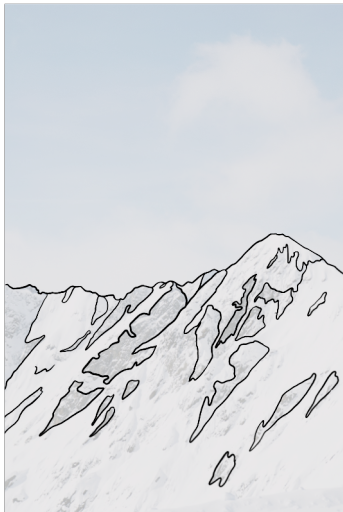

Design 1  
Maple  
with Coco Oak Coffee

Design 2  
Coco Oak Coffee  
with Maple

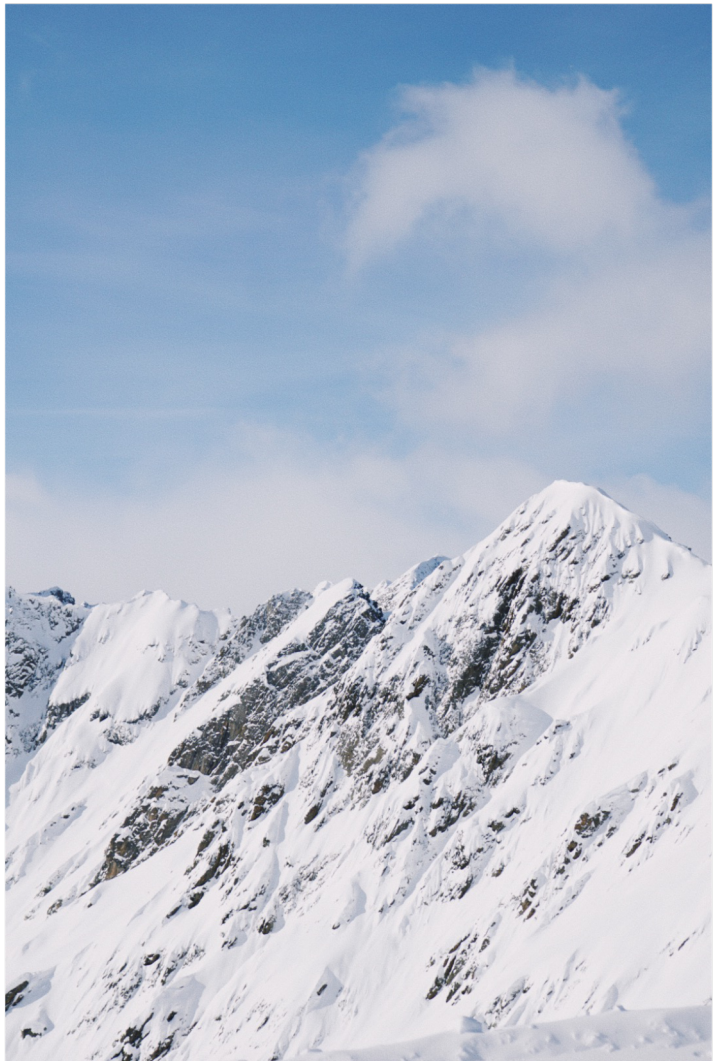

From your idea to the finished ski or board design. Usually, all we need is a hand sketch and lettering with your ideas and the additional photo or graphic material. Our design team will then implement your ideas or suggest a variation so that you can then decide on your favorite.

1

2

Whether laser engraving, inlay or even both:  
You can give us a photo of your favorite mountain and we'll take care of turning it into a simple or detailed inlay. Or even an engraving that brings out all the rock shades.

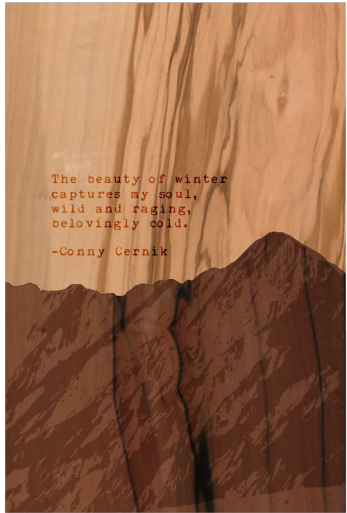

3

4

5

6

- 1 We sketch the characteristics of your motif to be able to use them for flat inlays.
- 2 Or we convert the photo into a black and white vector graphic, which is very well suited for engravings.
- 3 Simple inlay with coco oak coffee and olive
- 4 Delicate inlay with maple and coco oak coco oak
- 5 Engraving on cherry
- 6 Here we combine inlay and engraving. The shades of the mountain come out subtly on Indian apple. The poem is easy to read as an engraving - here on an olive veneer.

# PLASTIC TOPSHEETS

Most often we work with topsheets made of wood veneers. Not only because we love them - but because they are lovingly handcrafted just like our skis.

However, for some design requests, a plastic topsheet is sometimes the better choice. Especially colored designs without limitations in detail are printed on a plastic surface and then processed as a topsheet - just like you know it from conventional skis.

### You want to create your own design?

Then we will send you the appropriate outline as .DXF, .SVG, or .PDF. We need your finished design as a PDF in real size.

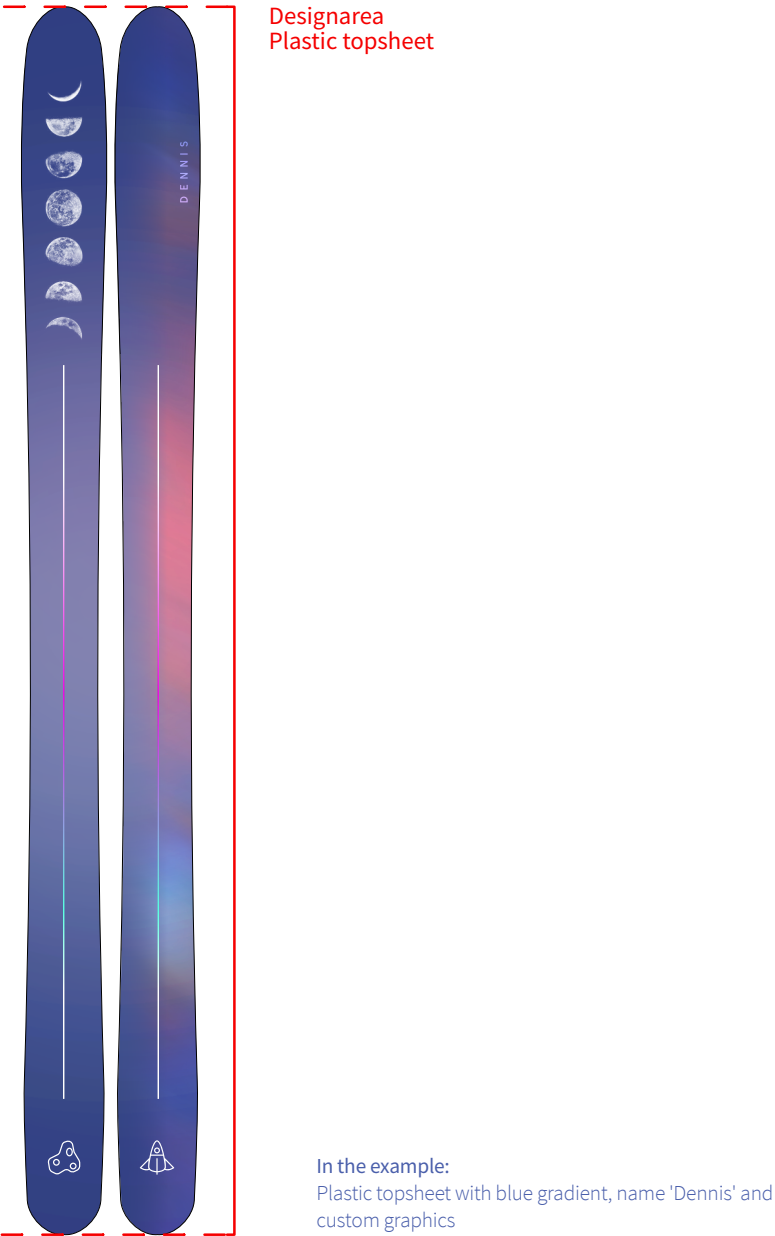

### We are happy to help you with the realization:

Just send us a sketch, description or file how you imagine your design and we will send you a draft.

Please contact us at least 4 weeks before the workshop, as we do not print the topsheets ourselves.

Plastic-Topsheet  
Colorful graphics can be best implemented this way.  
The matte surface gives the ski a modern, high-quality look.

## COLOR-PRINTED PLASTIC TOPSHEET, MATTE

Includes the finished printed plastic topsheet, without any graphic work.

- The basic price for a plastic topsheet is 150€ (excl. design)

### HELP FROM DESIGN TEAM

The creation of the graphic for your plastic topsheet takes some time. Depending on the effort, the price will be calculated.

- 70 € (per hour)

# OUR PRICES

Inlays and engravings must be well planned and produced with careful handwork. Since the prices depend on the individual effort, we have compiled four price examples for your information.

Generally, the price for your design is the sum of the basic wood type and the price for inlays or/and engravings.

## INLAY

- Mini
  - 60 €
- Small
  - 90 €
- Medium
  - 130 €
- Big
  - from 160 €

Includes a mini inlay with a maximum area of 10x10 cm.

Includes one small inlay or two mini inlays with a maximum area of 20x20 cm.

Includes a larger inlay of about 30x30 cm that goes over two skis or on a board in front or back - or several mini inlays.

Includes inlays across both front and back of the skis - or across the entire board.

## ENGRAVING

- Mini
  - 60 €
- Small
  - 90 €
- Medium
  - 130 €
- Big
  - from 160 €

Includes a mini engraving with a maximum area of 10x10 cm.

Includes one small engraving or two mini engravings with a maximum area of 20x20 cm.

Includes a larger engraving of about 30x30 cm that goes over two skis or on a board in front or back - or several mini engravings.

Includes engravings across both front and back of the skis - or across the entire board.

## THIS IS HOW THE PRICE OF YOUR WOOD DESIGN IS CALCULATED

The above indicative prices include the creation of your design as requested, including a change request. Further change requests will be charged per hour.

- Base wood veneer + **Inlays** + **Engravings** = Total design price
